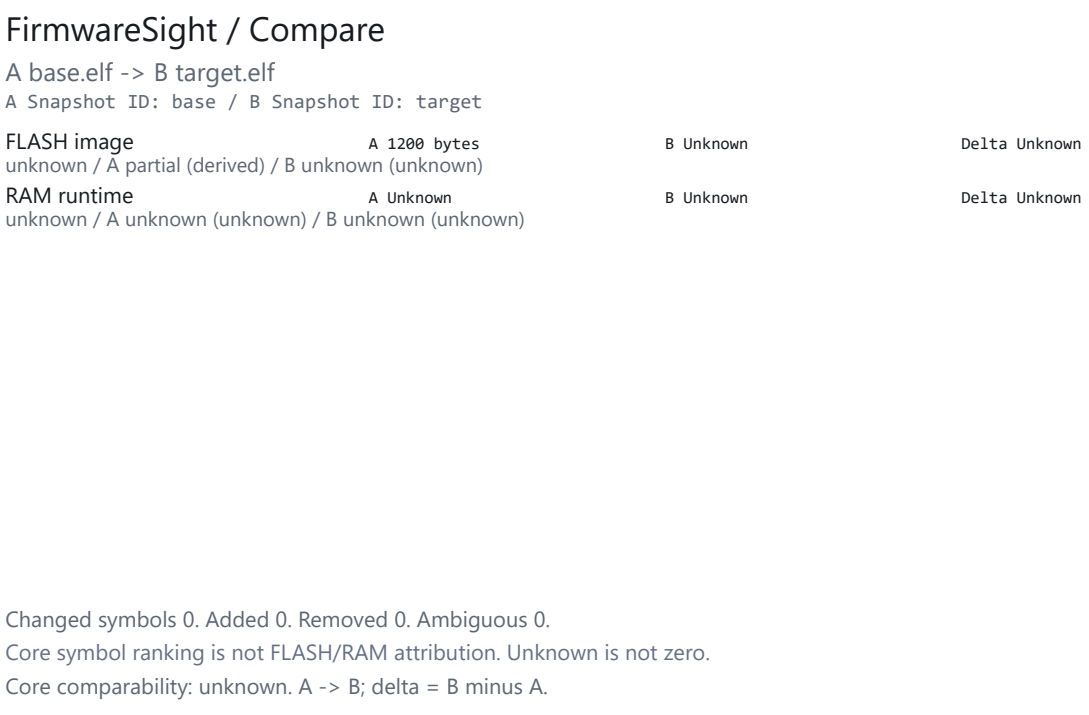
Compare visual overview



Visual summary only. Detailed evidence follows. Browser Print / Save as PDF; native PDF export is unavailable.

Identity and evidence detail

Identity	Value
A Snapshot ID	`base`
B Snapshot ID	`target`
A observed SHA-256	`bbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbb`
B observed SHA-256	`ccccccccccccccccccccccccccccccccccccccccccccccccccccccccccccccccc`

Measurements (exact bytes)

Fact	Value	Basis
FLASH image	A 1200 bytes | B Unknown | Delta Unknown	unknown / A partial (derived) / B unknown (unknown)
RAM runtime	A Unknown | B Unknown | Delta Unknown	unknown / A unknown (unknown) / B unknown (unknown)

Limits and next steps

- Core comparability: unknown. A -> B; delta = B minus A.
- Capacity unknown. Missing sides are absent, not measured zero.
- Symbol/section size changes are navigation evidence; their sum does not explain FLASH/RAM growth.
- Unattributed footprint remainder is not reliably quantifiable; object/module attribution unavailable.
- Changed symbols 0. Added 0. Removed 0. Ambiguous 0.
- the base budget is a partially accounted total and the target budget stores no number, so no delta is claimed
- the base budget stores no number and the target budget stores no number, so no delta is claimed
