Analyze visual overview

FirmwareSight / Analyze

large-u64.elf

`Snapshot ID: snap-ffffffffffffffffffffffffffff... / Observed artifact SHA-256: ffffffffffffffffffff...`

FLASH / nonvolatile image

`18446744073709551615 bytes`

exact / observed

RAM / runtime footprint

`0 bytes`

exact / observed

Capacity unknown for footprint budgets. Missing/partial evidence remains qualified.

闪存区域-配置空间配置空间… `Mapped 262144 bytes / capacity 262144 bytes`

Partial / Load / project-config / Review

Summary rows 1 of 1. Full labels, basis and identities in HTML detail.

Mapped occupancy is not footprint utilisation or allocator headroom.

MAP capability: not-provided. Object attribution: unavailable.

Visual summary only. Detailed evidence follows. Browser Print / Save as PDF; native PDF export is unavailable.

Identity and evidence detail

Identity	Value
Snapshot ID	`snap-ffffffffffffffffffffffffffffffffffffffffffffffffffffffffffffffff-p0-normalize-1`
Observed artifact SHA-256	`ffffffffffffffffffffffffffffffffffffffffffffffffffffffffffffffff`
FirmwareSight version	`0.6.0-visual-sample`

Measurements (exact bytes)

Fact	Value	Basis
FLASH / nonvolatile image	18446744073709551615 bytes	exact / observed
RAM / runtime footprint	0 bytes	exact / observed

Fact	Value	Basis
闪存区域-配置空间...	Mapped 262144 bytes / capacity 262144 bytes	Partial / Load / project-config / Review

Limits and next steps

- MAP capability: not-provided. Object attribution: unavailable.
- Capacity unknown for footprint budgets; region rows show mapped interval occupancy only.
- Region remaining space does not prove allocator or stack/heap headroom.
- elf.section_header[1] address plus size overflows the supported address range
- Regions shown: 1 of 1. Full section/symbol evidence remains in analysis JSON.

Use the original JSON / detailed Compare HTML / verified Release Bundle for complete engineering evidence.
