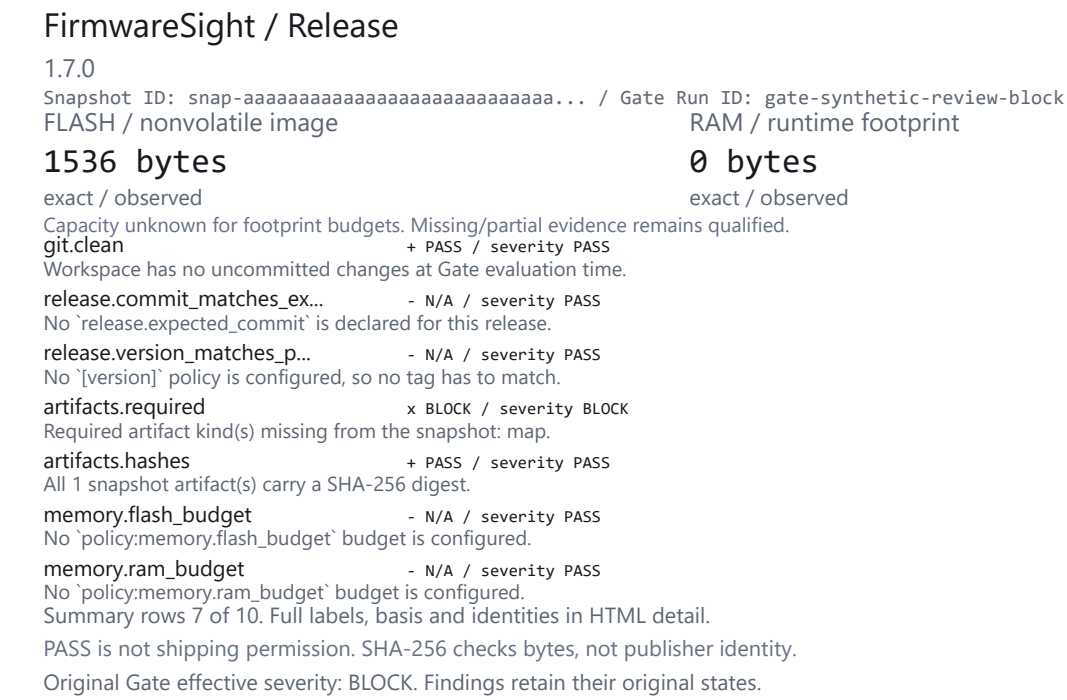
Release visual overview



Visual summary only. Detailed evidence follows. Browser Print / Save as PDF; native PDF export is unavailable.

Identity and evidence detail

Identity	Value
Snapshot ID	`snap-aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa-p0-normalize-1`
Gate Run ID	`gate-synthetic-review-block`
FirmwareSight version	`0.6.0-visual-sample`
Release ID	`release-eeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeee`
Project release version	`1.7.0`
Observed 4096 bytes: 固件-controller.elf	`aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa`

Measurements (exact bytes)

Fact	Value	Basis
FLASH / nonvolatile image	1536 bytes	exact / observed
RAM / runtime footprint	0 bytes	exact / observed
git.clean	+ PASS / severity PASS	Workspace has no uncommitted changes at Gate evaluation time.
release.commit_matches_expected	- N/A / severity PASS	No `release.expected_commit` is declared for this release.
release.version_matches_policy	- N/A / severity PASS	No `[version]` policy is configured, so no tag has to match.
artifacts.required	x BLOCK / severity BLOCK	Required artifact kind(s) missing from the snapshot: map.
artifacts.hashes	+ PASS / severity PASS	All 1 snapshot artifact(s) carry a SHA-256 digest.
memory.flash_budget	- N/A / severity PASS	No `policy:memory.flash_budget` budget is configured.
memory.ram_budget	- N/A / severity PASS	No `policy:memory.ram_budget` budget is configured.
diff.growth	- N/A / severity PASS	No `[diff]` growth threshold is configured.
release.notes	o UNKNOWN / severity REVIEW	No observation was recorded for `release.release_notes_path` (RELEASE_NOTES.md).
evidence.unknown_review	! REVIEW / severity REVIEW	1 snapshot evidence item(s) are Unknown, at or above the review threshold of 0. The items stay Unknown; this finding asks a person to look.

Limits and next steps

- Original Gate effective severity: BLOCK. Findings retain their original states.
- PASS is a policy result, not shipping permission or security certification.
- SHA-256 checks bytes, not publisher identity or build provenance.
- Capacity unknown. Workspace Git facts are not proof of the shipped firmware build.
- Findings shown: 10 of 10. Read gate-results JSON for full evidence and remediation.
